several design awards, reddot/best of the best of design-center nordrhein-
westfalen

the idea: furniture from a vending machine ...

Just imagine these situations:

You invited for diner, but the moment it starts, You find out, there are not enough seats for Your guests...

You ordered the new „encyclopedia“ consisting of 12 big volumes, but your book shelf is full ...

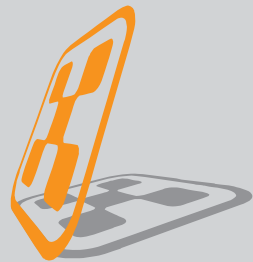

The preparations for the buffet are finished, but a table for the desert is missing...

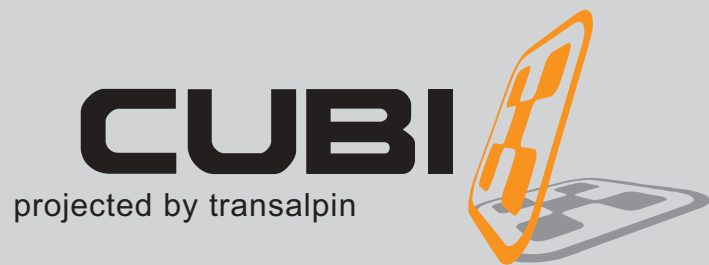

„cubix–instant furniture“ is a brandnew, exceptional furniture-concept : in case of emergency, just complete Your collection from the slotmachine round the corner ...

Doesn't matter if chair, table, shelf or lights: every piece comes out of the same cube of 16 cm length. Just choose, pay and pic it up. At home You pull the red line and Your furniture grows in front of You - thats it!

CUBI
